company formed in Cariboo last season ob A company formed in Cariboo last season obtained from the Government of British Columba a grant of the Bed of Antler Creek 16% miles in length by 100 feet in width for the purpose of laying a Bed-rock Flume and Hydraulic Washing.

ng.
The Antler Bed-rock Flume Company (Limit-d), has been organized for the purpose of work-mag the above ground, the proprietors of the grant having accepted for their interest 1200 paid

ing the above ground, the proprietors of the grant having accepted for their interest 1200 paid up shares.

A Lease: for 10 years has been given by the Government of British Columbia direct to the "Antler Bed rock Flume Company" (Limited.) 200 Shares have been reserved, to be disposed of by the Directors hereafter for the benefit of the Company as circumstances may determine.

It is confidently believed by experienced miners that the (Bed-rock) Flume system will work an entire revolution in the mining operation of Cariboe, and render large districts available which under the present system are valuelless.

Great excitement was caused in 1861 by the rich deposits of gold found on Antler Creek; much ground yielded over \$1,000 per foot. It was found, waverer that excent where the soil was shallow,

the tailings washed into the flume from adjoining claims; it is this source of revenue alone which ronders Bedrock Flumes so profitable in California.

Under these circumstances the Directors can confidently recommend the undertaking to the support of the public.

Applications for the remaining shares to be made to the Secretary without delay.

By order,

J. J. COCHRANE, Secretary,

ground yielded over \$1,000 per foot. It was found, however, that except where the soil was shallow, it was impossible to reach the bed-rock and work to advantage, on account of the immense amount of water and the looseness of the soil, consequently the Greek gradually became abandoned. The amount-of-water and character of the soil are highly favorable for hydraulic working, while the fall in the Creek renders it most suitable for a Bed-rock Flume.

The soil on Anther Creek contains gold generally throughout, from the surface down, whilst the bed-rock deposits have been found to be very rich, the prospects therefore of the undertaking proving most profitable, amount almost to a certainty.

Besides the gold found in the ground, worked by the Company, it will derive great profit from the tailings washed into the flume from adjoining claims; it is this source of revenue alone which renders Bed rock Flumes so profitable in Cali-CLOTH-Superfine Black and Blue, Fine Blue, Fine Scarlet and Pilot. LEGAL REFORMS. There is always an indefinite and perhaps indefinable expectation amongst people, classes, and nations, on the event of any change in their regime which will place them under a new system of government or even under a new individual or set of individuals as the governing body, that some change for the better will take place in the ordering of affairs in general, and it is not unnatural that it should be so; it is in the nature of all mundane affairs to progress er retrogrado, and none but the most gloomy minds will look forward to a worse prospect for the future than the present offers to the notice, consequently man almost invariably looks forward us until the sere and vellow leaf warns us o the certain end of all that is bright and hope ful in life, can sit down and calmly reckon upon the future as blank and wanting in increst. With colonists there are periods in the somewhat monotonous routine of life, strongly marked as it is with the toil and turmoil of constant labor and striving with fortune, which seem to be important phases in the progress of the country in which their lot may be cast. Foremost amongst these is the change of the representative of the sovereign power. Although public affairs seemingly go on from lyear's end to year's end under one governor as under another, it is impossible to divest the mind of the feeling that under a new Governor such a thing may be altered, such alministration of affairs that may be improved, but whether or not we are justified civil courts we may certainly look for some The advent of a Governor with some experience and know

to things improving as years go on. Few off CHERRY, The Trees are all grafted, and from two to three ears old. n system changed, and such a routine varied. Much there is unquestionably in our own in expecting any material changes we cannot say. In the administration of justice in our ledge of the effect of an admirable system of jurisprudence and practice, as is maintained in the courts at Westminster Hall, will probably be the signal for some changes in our own courts of law. No better time could be chosen for inaugurating a concurrent jurisdiction between our courts and those of British Columbia. Even under distinct Governors, and separate altogether as colonies, from the close contiguity of the two, the relations batween Vancouver and the mainland must always be intimate and their interests, in many respects, similar. As a matter of course, as the two colonies advance and increase, mercantile houses trading and carrying on business in the one, wil have their branch houses and places of busi ness in the other, and it is a -matter of great importance to them that a claim which has been acknowledged and adjudicated upon here should be recoverable in British Columbia, and vice versa, instead of its being neces sary, as at present, after getting judgment for a dobt in the one colony for the plaintiff to commence proceedings de novo on the judgment obtained in the other colony. A concurrent jurisdiction given to the judges of both Colonies, enabling the Chief Justice of Vancouver Island to issue chief Justice of Vancouver Island to issue an execution addressed to the Sheriff of AUCTION. British Columbia, just as one of the Judges in England can direct a writ to the Sheriff of any county in England or Wales, would at once rut an end to much that is inconvenient under our present system, and would prevent the frequent recurrence of arrest of the lieges of British Columbia when they set foot upon our shores, which, be it observed, is the greatest abuse of the writ of ne exeat reano which can be conceived, for it was never contemplated by the law, that an individual leaving his ordinary place of business, for the purpose of transacting other business in a spot which happens to be without the jurisdiction of the court having authority in the place where he lives, should b detained and incarcerated in the town where he is only temporarily sojourning, until he puts in bail undertaking to appear to the action brought against him at the place where he is arrested, at a distance from his own residence, and perhaps also, from the place where his debt was contracted. What would be said in England if Dublin and Liverpool merchants were systematically arrested and SHERRY held to bail when they visited either of the towns on the opposite sides of the channel, and in order to force a settlement, were compelled, the Englishman to try his cause in Dublin, and the Irishman in Liverpool? Such a state of things would not be telerated for a moment, and yet it is but on a par with what constantly pecurs here. If the courts of both colonies had concurrent jurisdiction this evil would at once cease, for a debtor might go up to Cariboo and still not go beyond the jurisdiction of our courts. In addition to this, the advantage that we might gain from having an appellate court would be very great to litigants. These and similar matters which do not come exactly within the scope of the Legislature must be pressed upon the attention of the new Governor when he arrives. If changes are to be made, and improvements are possible, it becomes the duty of the public to point them out, and it is but reasonable to suppose that they may be advantageously and opportunely carried

THE TELEGRAPH SCHEME. The Bill to enable the California State Telegraph Company to extend their line to this city, was laid before the House yesterday, and it is justly deemed of such impor-tance that the House has been asked to sustance that the House has been asked to suspend the standing orders, so that it may be passed with as short detention as possible. The rules of the House in regard to private bills, require that a notice of three weeks be given before any such bill can be introduced by the the enforcement of this in the present inbut the enforcement of this in the present inapee, and at this late period of the session

to throw away the been offered us by this overland route, we, with British Columbia, were asked to pay £12,500 annually, and ther wait five years for its completion; whereas by the present scheme we are asked for no subsidy, we obtain all the immediate advantage offered by the grand line, and in a very much shorter time. Should the bill be ado ted by the House, it is not at all improbable looking at the fact that the Atlantic cable i expected to be laid this summer, that we may Christmas, an idea that, but a year ago, would have been set down as chimerical in the extreme. The interference with the standing orders of the House, although not a DAMAGED practice to be encouraged, cannot, in th present instance, be productive [of any evil consequences; the principal object of the three weeks notice, required for private bills, is that no other interests, public or individual, may be prejudiced, and as no such difficulty can possibly arise in this case, the rules may safely be dispensed with. There will be for the full discussion of the bill, and the rejection of any of its provisions which may ourse which may endanger the success

A Policeman Shot by a Might Watchman.

Last night, at 12 o'clock, as Thomas Bar rett, night watchman, was passing along Store street, he discovered Copperman's store door standing open. Suspecting something wrong, he went forward and looked in the store, when a man who was inside sprang out

ed escaping by the back door, immediately rushed round towards the rear of the house when he was met by officer Curry, who was just at that moment coming up from the side of the ravine. Mistaking him for the burglar or a confident, Barrett shouted "Stand back, or I'll shoot !" but Curry, who doubtless labored under a like error, pressed in upon him, on which the latter drew his revolver and fired, inflicting a frightful wound in poor Curry's right side and causing almost instantaneous death.

Barrett at once blew his whistle for assistance, and on another officer arriving, he proceeded to examine the prostrate man, when to his horror he discovered his fatal He at once despatched the officer for a doctor, and kneeling down by the dying man, asked if it was he who had struck him, to which the unfortunate officer with his last gasp feebly replied "I struck no man," and expired.

Upon the return of the officers Barrett at once gave himself up, and was lodged in gaol, where Dr. Chipp dressed the wound in his forehead. The dead man was also brought to the barracks. Doctors Trimble and Haggin were in attendance, but soon found that their aid was of no avail.

—Mr. Bishop for Plaintiff; Mr. Dennes (in the absence of Mr. Green) for Defendant Barnston. Mr. Park (instructed by Mr. Dennes) for defendants Laumeister and Suter.

Mr. Bishop said this was a suit for wages for work done on a claim in Lowhee, known as the Princess Alexandra.

He called the plaintiff, who proved the work done, and engagement by Foley, the manager; and also produced an order given by Foley on Barnston. Mr. Stewart was called as a witness, and corroborated plaintiff's statement as to the work done. On cross-examination by Mr. Park, he admitted he had worked for and represented the claim held by Mr. Suter and a Mr. Kane, jointly, and had nothing to do with any other interest.—

He had been paid by Mr. Suter.

Mr. Dennes, on behalf of Barnston, urged the nonjoinder of the rest of the shareholders as a good reason why his client should not be held liable, and further that his client had

ANEXATION OF QUEEN CHARLOTTE ISLAND.

Mr. Franklin asked the House to appoint a
da, to go into committee on the above measure. He brought forward this motion because he believed that the addition of Queen
Charlotte Island would materially strengthen
the colony of Vancouver Island, while it
would not in any degree do an injustice to
British Columbia. The hor, member described the relative position of the island to
the two colonies, and showed that, geograhically speaking, it should be attached to phically speaking, it should be attached to Vancouver Island. The inhabitants of this olony had expended upwards of \$50,000 in colony had exponded upwards of \$50,000 in endeavoring to develop the mineral resources of Queen Charlotte Island, and had been put to considerable expense in paying duties, head money, etc., besides paying registration fees, and keeping up an office in British Columbia, at much additional cost. Although the Organic Act of British Columbia included Queen Charlotte Island within the boundaries of that colony, these laws were not unchangeable like those of the Medes and Persians; the Organic Act had fixed the northern boundary at latitude 54°. 40° north, but a subsequent Act had changed it to 60°. but a subsequent Act had changed it to 60°, north, and by making representations in the proper quarter, we might succeed in obtaining the most desirable end of joining that is—land to this colony. He would therefore move that the House go into committee to-morrow on the motion. Carried.

No one who has been conversant with the Northern States during the last two and a-half years can have failed to notice with astonishment the faith stronger than death which the Northerners have exhibited in their "star," their "manifest destiny," their "religion," their Alpha and Omega, their dream of dominion from sea to sea, and (to quote Mr. Everett's words) "from the icy Pole to the flaming belt of the Equator." No parallel faith has eyer been exhibited by the Confederate States in their future. Six great Southern victories in the field and drawn battles, exhausting the aine principal collisions of the exhausting the nine principal collisions of the war, the entire absence of any such panic routs as Bull Run or Chicamauga, the tried inefficacy of the Federal blockade, the unmolested predatory flight of Alabamas and Floridas at sea, have altogether failed to inspire the South with a tithe of that confidence in themselves, which neither defeat nor disaster, nor hope deferred, nor illusious dispelled, have over shaken out of the Northerners Deny it who may, there is something sublime in this shadowy carcestness and misty magnificence of Northern faith and self-relinnee. Would that I could see promise of future and final Southern triumph in any corresponding quality of the Southern mind! In many fashions Southern unfaith crops up and recoils upon onte as Bull Run or Chicamauga, the tried Southern unfaith crops up and recoils upor the Confederate government, making, for in

the Confederate government, making, for instance, Mr. Memminger's task, though he takes his stand upon raw material worth sixty or seventy millions of pounds sterling, Herculean as compared with Mr. Chase's, who issues vastly larger promises to pay on a security of breadstulf experts worth only sixty or seventy millions of dollars. There are, of course, other reasons to account for the fact that three dollars in "greenbacks" will buy two dollars in gold, while it requires thirty paper dollars of the Confederacy to buy a like sum; but the fundamental explanations like sum; but the fundamental explanations of the discrepancy in value of the irredeem able paper issues of the two sections lies in the vastly superior faith in themselves of the

In this emergency all eyes turn to the Confederate Congress, which meets upon the 7th of Deo ber; and never was graver question sucmitted to a deliberative assembly than that which awaits its immediate discussion.
